PROBLEM 8 - Passing Cars

CREATE variables to track the pairs of passing cars and the number of 1's seen so far in A.

FOR each element in A (from back to front)

IF the element is a 1

ADD +1 to the number of 1's seen so far

ELIF the element is a 0

ADD the number of 1's seen so far to the pairs of passing cars.

IF the pairs of passing cars exceeds 1 billion

CHANGE the pairs of passing cars to -1

BREAK

RETURN pairs of passing cars.
