PROBLEM 7 - FrogRiver One

CREATE a list of length X to track how many leaves are in eadd position across the river

CREATE a vairable to track the time passed.

FOR each leaf that falls on the river

IF at least one position contains 0 leaves

ADD +1 to the time passed

ADD +1 leaf to the list in the position that it falls

ELIF each position contains at least 1 leaf

BREAK

IF all leaves have fallen and at least one position contains 0 leaves

CHANGE the time passed to "-1" since the river is impassible

RETURN time passed
